

Course Concepts

-Technological Determinism

.Technology influences social life

-Media Ownership

The government controls the chip implants, and the music that plays, as well as other propaganda, effectively owning all forms of media.

-Ideologies

.They all view their society as normal, due to the effects of the chip and music

Logline

- Earon, a 19-year-old nonbinary person, lives in a society where the government constantly plays propaganda music that connects to a chip in the brain. Earon is attacked late one night and receives a blow that breaks the chip, making them immune to the effects of the music.

Setting

- An asian country, very homogenous
- Something similar to a 1984 type of society

Characters

- A nonbinary person, Earon, Asian descent.
- Male attackers, also asian
